

## Sanquin Reagents

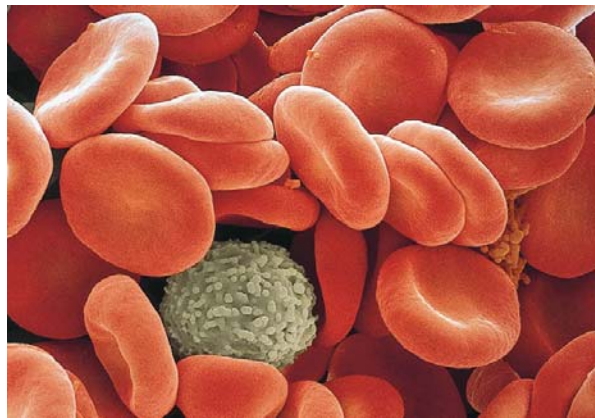

### Introduction:

Sanquin Reagents is among the first manufacturers of blood group and immune reagents. By virtue of its research facilities and diagnostic laboratories, Sanquin developed a broad range of blood group and immune reagents, including several innovative products for diagnostic use and for fundamental and clinical research.

Sanquin reagents are available worldwide through a network of distributors. They are intermediates between local clients and Sanquin for physical product distribution, information and services. Sanquin Reagents is ISO 9001 and ISO 13485 certified. Sanquin Reagents makes effort to meet the requirements of its customers by continually expanding its range of reagents.

### Blood group reagents:

- Micro column technology for detection of red cell antibodies: Cellbind<sup>®</sup> and fully automated testing on the Magister<sup>®</sup>
- Monoclonal and polyclonal typing reagents for AB0, rhesus and rare blood groups
- Coombs reagents, enzymes and potentiators
- Kits for quality control and proficiency testing
- Micro test plate systems for platelet cross-matching
- Software for the identification of unexpected antibodies: PeliPIP<sup>®</sup>

### Immune reagents:

- Reagents for the quantification of human IgG subclasses and other human serum proteins
- Cell-specific monoclonal antibodies for immunologic classification of hematopoietic cells
- Reagents and kits for cytokine research: Elisa/Elispot<sup>®</sup>
- Automated reader for Elispot plate: Aelvis<sup>®</sup>
- Peptide MHC multimers for detection of antigen-specific T-cells
- Distribution for other manufacturers in the Benelux
- OEM supplies for other IVD companies

### Address:

Sanquin Reagents  
Plesmanlaan 125  
1066 CX Amsterdam  
The Netherlands
